

NASA is more than just astronauts

NASA is looking for people with a variety of backgrounds: microbiologists, geologists, physicists, astronomers, electricians, mechanics, computer programmers, electrical, mechanical and civil engineers, medical doctors, health professionals, and many more people in a variety of professions. It's not just about space. It's also about airplanes and science, Earth science, climate change, and about technology to improve our lives.

All students who are highly motivated and seeking a career in science, engineering, mathematics, technology and science education are encouraged to apply for our:

Undergraduate Scholarships

Graduate Fellowships

NASA and Industry Internships

Nevada NASA Space Grant Consortium

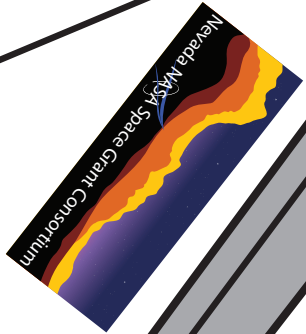

Visit our website for more information
